

```
POST /the-api
{
  lists {
    id
    items {
      id
      what
      when
      byWho {
        id
        name
      }
    }
  }
}
```

HTTP/1.1 200 OK

```
{
  "lists": [
    {
      "id": "1",
      "items": [
        {
          "id": "2",
          "what": "",
          "when": "2019-01-06T15:38:53",
          "byWho": {
            "id": "3",
            "name": "Blargh"
          }
        }
      ]
    }
  ]
}
```

The simplest data query?

POST /the-api

```
{
  lists {
    id
    items {
      id
      what
      when
      byWho {
        id
        name
      }
    }
  }
}
```

HTTP/1.1 200 OK

```
{
  "lists": [
    {
      "id": "1",
      "items": [
        {
          "id": "2",
          "what": "",
          "when": "2019-01-06T15:38:53",
          "byWho": {
            "id": "3",
            "name": "Blargh"
          }
        }
      ]
    }
  ]
}
```

Queries with parameters?

```
{  
  list {  
    id  
    items {  
      id  
      what  
      when  
      byWho {  
        id  
        name  
      }  
    }  
  }  
}
```
