

```
{  
  notLists {  
    id  
  }  
}
```

```
{
  "error": {
    "errors": [
      {
        "message": "Cannot query field \"notLists\"
on typea\"Query\".",
        "locations": [
          {
            "line": 2,
            "column": 3
          }
        ],
        "extensions": {
          "code": "GRAPHQL_VALIDATION_FAILED"
        }
      }
    ]
  }
}
```

A good way to describe errors

```
{
  notLists {
    id
  }
}

{
  "error": {
    "errors": [
      {
        "message": "Cannot query field \"notLists\"
on type \"Query\".",
        "locations": [
          {
            "line": 2,
            "column": 3
          }
        ],
        "extensions": {
          "code": "GRAPHQL_VALIDATION_FAILED"
        }
      }
    ]
  }
}
```

Namespace errors and data
