

Fixing REST:

Handling non-crud

Problem:

- The world isn't based on CRUD
- RPCs are shoehorned into CRUD operations

Solution:

- Introduce “safe” and mutating queries

Mutating queries

```
query {  
  list(id: "1") {  
    id  
    items {  
      id  
      what  
      when  
      byWho {  
        id  
        name  
      }  
    }  
  }  
}
```
