A simple type system

```
type List {
  id: ID!
  name: String!
  items: [ListItem!]!
}

type ListItem {
  id: ID!
  what: String!
  when: Date
  byWho: User!
  list: List!
}
```

A simple schema

```
type Query {
  lists: [List!]!
  list(id: String!): List!
}

type Mutation {
  createListItem(
    listId: ID!,
    what: String!,
    when: Date,
    byWho: ID!
  ): ListItem!
}
```
