```json
{
    "lists": [
        {
            "id": "1",
            "items": [
                {
                    "id": "2",
                    "what": "",
                    "when": "2019-01-06T15:38:53",
                    "byWho": {
                        "id": "3",
                        "name": "Blargh"
                    }
                }
            ]
        }
    ]
}
```

The simplest data query?

```json
{
  "lists": [
    {
      "id": "1",
      "items": [
        {
          "id": "2",
          "what": "",
          "when": "2019-01-06T15:38:53",
          "byWho": {
            "id": "3",
            "name": "Blargh"
          }
        }
      ]
    }
  ]
}
```

The simplest data query?

```
{
  "lists": [
    {
      "id",
      "items": [
        {
          "id",
          "what",
          "when",
          "byWho": {
            "id",
            "name"
          }
        }
      ]
    }
  ]
}
```
